MEMORANDUM FOR THE CHAIRMAN, IMAGERY PLANNING SUBCOMMITTEE

SUBJECT: Community Requirements of AIRES Support

1. The Advanced Imagery Requirements and Exploitation System (AIRES) is undergoing an upgrade (AIRES 2) to provide enhanced system capabilities in the mid-80's.
2. The upgrade will be commensurate with the upgrades of CAMS and NDS, but enhanced AIRES will utilize the same terminal (Univac 1652) currently in use.
3. DIA is conducting a survey of national community terminal requirements to identify anticipated mid-80's need for AIRES support. Currently, AIRES terminal distribution in the community is as follows:

CIA	1
<input type="text"/>	1
NPIC	1
STATE	1
NAVY/NISC	1

STAT

Each of the above terminals require a dedicated port.

4. Requirements for AIRES terminals must be funded by the requesting agency as the DIA budget for terminals through FY85 provides only for terminals to operational units within DIA.

5. Request IPSCOM assess community needs for AIRES terminals and provide response to DIA by 8 October so that additional terminals can be ordered.
